General Comment:

This is a follow-up inspection to Field Inspection Report (Doc #696105732) and Operator submitted FIRR (Doc #403342745) to document corrective action compliance.

Location

Overall Good:

Emergency Contact Number:

Comment:

Corrective Action:

Date: _____

Good Housekeeping:

Type	OTHER		
Comment:	It appears the Operator has performed the corrective action to remove the antifreeze from the engine skid and placed rags to soak up any free fluids in the containment. During this inspection, Staff observed that the rags were saturated and that residual antifreeze was still within the containment, though it appeared to be diluted. As this is an ongoing compliance issue, the Operator is being required to inspect equipment to verify that the source of the antifreeze leak is fixed to prevent further occurrences.		
Corrective Action:	Remove and properly dispose of any remaining free fluids and Securely fasten all valves, pipes, fittings, and Production Facilities to ensure good mechanical condition, inspect at regular intervals and maintain in good mechanical condition per Rule 608.e.	Date:	04/19/2023
Type	OTHER		
Comment:	During this inspection, Staff observed an unknown fluid within the secondary containment of an elevated storage tank and was unable to verify if fluid originated from the tank. Refer to attached inspection photos for documentation.		
Corrective Action:	Conduct maintenance on equipment, cleanup stained material (e.g. milky fluid in containment) and review self inspection processes per Rule 1002.f(2)D.	Date:	04/12/2023

Overall Good:

Spills:

Type	Area	Volume		

In Containment: No

Comment:

Multiple Spills and Releases?

Fencing/:

Type			
Comment:	It appears the Operator has performed the corrective action and installed wildlife exclusion devices on the engine shed. Refer to attached inspection photos.
