COGCC Inspection Report SummaryOn Monday 4/10/23 at approximately 1142hrs I, Inspector Adam Burns, Conducted an on-site inspection to Incident Report #403368890 at Gutttersen DD08-02 Pad of ChevronLocation ID #459852 in Weld County, Colorado.While there, I was observing Chevron conducting a clean up to the incident that occurred. I was informed from the Chevron representative on location that the fence crew on 4/6/23 was placing fence posts around the gas lift shed while the location was shut in. While digging the holes the auger on the fence digger unknowingly struck the bulk flow line for the wells on location. Wells were returned back to production on 4/7/23 when chevron noticed oil, gas, and produced water flowing and released to surface approximately 10 BBLS of fluids were released. Wells were shut back in. Clean up and soil testing are in progress. This is a summary of the inspection report.
