API: 055-06012 | Date: 4/10/2023

## Inspection Photos

**Photo 3.** Facing toward the produced water tank. The secondary berm around the tank is insufficient to contain a spill. Red arrow points to small berm which could easily be overtopped by a leak.

API: 055-06012 | Date: 4/10/2023

## Inspection Photos

**Photo 4.** There is oily fluid and stained soil at the pipe outlets of the tank.

**Photo 5.** There is oily fluid inside this container used for containment. This needs to be cleaned up and should be netted to prevent wildlife entry.

API: 055-06012 | Date: 4/10/2023

## Inspection Photos

**Photo 12.** Facing toward the northwest side of the location. It appears the chaulky white soils were pushed out in this area. All unneeded disturbed areas will need to be reclaimed per 1003 rules.
