Stormwater Discharges Associated with Construction Oil and Gas Activity. The location is an existing, all ready constructed oil and gas location, and no new construction or surface disturbance is anticipated. In the event that there is, an application to the Colorado Department of Public Health and Environment Water Quality Control Division would be submitted, with an approved permit before any dirt work begins, if any, or if ever.

Re-Complete by adding perforations to an existing wellbore, already producing, on an existing location, Bredehoft 13-6 well.

T1S, R67W

Sec. 6: NW/4 SW/4

Adams County, Colorado

Description of Well Site Area

1-3 acre site with access road for operating of an oil and gas well. Terrain is farmed and/or rangeland. No receiving waters will be affected by the existing well location or construction activity. No drilling is anticipated, and no new construction is anticipated. There will be no drilling pits. Any disturbed areas as a result of any workover or recompletion activity will be reseeded within 6 months weather permitting. Adsorb will be on location at all times, and the location will be a no release location and operation, as is typical with recomplete work. Although no top soil disturbance is anticipated; however, silt fences will be installed on low side site of activity, also with adsorb on location.

Stormwater Management Plan (SWMP) is on file in Helena Resources, Inc.'s office.
