Department of Natural Resources

Inspection Photos
Location Name: Allred 8-59-30
Location ID: 476815

Photo 1. Facing north from the western portion of the location. It appears the operator has performed interim reclamation activities with the evidence of drill rows and mulch, and germination present at the time of this inspection. Staff will conduct a follow-up inspection at a future date to verify vegetation establishment in accordance with Rule 1003.

Location Name: Allred 8-59-30
Location ID: 476815

Photo 9. Facing south from the northeastern corner of the location. During this inspection it was observed that the fil-trexx wattles installed on the perimeter of the location have become buried in sediment and show signs of deterioration. These BMPs require maintenance and or replacement to be adequate in controlling stormwater run on and run off.
