Comment This location is in compliance with Rule 1003. Appears the Operator has performed interim reclamation activities to reduce disturbance areas only needed for production operations, with the evidence of uniform, desirable vegetaion (e.g. blue grama, purple three awn, etc) throughout the interim areas. There was a small area (e.g. 1-3 individual plants) of russian thistle identified on the southern portion of the location, south of the well, that will require management during the next local growing season. Operator shall continue to monitor and manage this site for stormwater and weed management.

Comment: This location does not comply with Rule 1002.f. During this inspection it was observed that the production area is experiencing rill erosion and is beginning to exit off into the interim areas. The production area will need to be stabilized and stormwater BMPs will need to be implemented to prevent further degradation to the interim areas. Refer to attached inspection photos for documentation.

Corrective Action: Comply with Rule 1002.f.(2) to install/repair BMPs in accordance with good engineering practices. Date: 04/15/2023

Pits: NO SURFACE INDICATION OF PIT
