General Comment:

On 4/17/2023, Reclamation Specialist Trujillo conducted a final reclamation and stormwater inspection at the Blair 1 Location in Mesa County, Colorado.

COGCC Records show Laramie Energy LLC #10433 as Operator on record for the Location, and Black Hill Plateau Production LLC #10150 as the Operator for the well; Form 9(s) #402649497 is "in process". Inspection and corrective actions are being submitted to both Operators.

This inspection is a follow-up inspection to #696203693 dated 5/10/2022, and #696204247 dated 10/11/2022 to document compliance for the following corrective actions:

- Final Reclamation/Plugging and Abandonment requirements
- Stormwater

It was observed that the Location remains out of compliance with COGCC Rules and Corrective Actions

Refer to the "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Corrective Action: _____ Date **07/31/2022**

Comply with 1004.a and 434.a.(5) requirements and conduct final reclamation. At a minimum, removal of gravel, compaction alleviation, recontouring and regrading activities is required to be completed by 7/31/2022. To allow for a fall seeding, revegetation activities are required no later than 11/15/2022. Operator shall ensure temporary control measures are implemented and maintained until revegetation activities are conducted, at which point controls to stabilize the seeded soils are required; Operator shall maintain stormwater and erosion control measures until site receives a passing final inspection.

Well Release on Active Location ☐Multi-Well Location ☐**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: Previous inspection observed that BMPs to control stormwater runoff in a manner that minimizes erosion, transport of sediment offsite, and site degradation are missing or insufficient at the Location and access road; stormwater runoff has resulted in erosion at the exposed cut and fill slopes of the Location resulting in degradation and sediment transport; gully erosion also evident along access road. Inspection required Operator(s) to comply with 1002.f by 10/27/2022.

It was observed in this inspection that corrective actions to address the stormwater and erosion degradation issues have not been taken by the Operator(s); erosion, degradation and sediment transport at the Location and access road has persisted.

Corrective Action: Comply with 1002.f and install required stormwater and erosion control BMPs at the Location and access road to control stormwater runoff in a manner that minimizes erosion, transport of sediment offsite, and site degradation. BMPs shall be installed in accordance with good engineering practices, and maintained until final reclamation is achieved pursuant to Rule 1004.

Pits: ☐ NO SURFACE INDICATION OF PIT**COGCC Comments**

Comment	User	Date
<p>FINAL RECLAMATION COMMENTS</p> <p>Previous inspection observed that Final Reclamation has not been conducted in accordance with COGCC 1004 requirements; Reclamation at the Location and Access road including, but not limited to, removal of gravel, compaction alleviation, recontouring/regrading and revegetation activities has not been conducted; cut and fill slopes remain evident. Inspection also observed that Operator has left a welded plate at surface of the well as a "marker"; markers are required to be a piece of pipe not less than 4 inches in diameter and not less than 10 feet in length, of which 4 feet shall be above the general ground level; monument left at surface does not comport with abandoned well marker requirements. Inspection required Operator(s) to conduct final reclamation with, at a minimum, the removal of gravel/road base, compaction alleviation, recontouring and regrading activities to be completed by 7/31/2022, and revegetation activities required to be completed no later than 11/15/2022.</p> <p>It was observed in this inspection that final reclamation activities, pursuant to 1004 requirements, have not been conducted: Gravel/Road base has not been removed from the access road and Location; Access road and Location has not been decompacted, recontoured/regraded, and revegetation activities have not been performed. Operator(s) has(have) also failed to manage stormwater on the Location and access road (see "Stormwater"), and remove or install a well marker that comports with COGCC well abandonment requirements.</p> <p>Corrective actions have not been addressed and remain applicable.</p>	trujilloam	04/19/2023
