## POTENTIAL FLOW AND CONFINING FORMATIONS

[illegible]

This well is a single exploratory conventional vertical helium gas well. The well will be air drilled. There will be no drilling mud, hydraulic fracturing, stimulation, or flowback. The well is not expected to produce hydrocarbons or water based on results from wells already drilled in this area.

There is no anticipated cut or fill needed to support well drilling. Minimal topsoil will be disturbed. Salvaged topsoil will be stockpiled and restored on the reclaimed area. Drill cuttings from the well will be handled in accordance with Rule 905.e. They will be placed temporarily in a lined, bermed trench area on the Working Pad Surface..

A synthetic liner will be placed under the drill rig to capture incidental leaks or drips.

There will be no hydrocarbon-based waste to reuse or recycle.

Production casing will only be used if water or unconsolidated sandstone is encountered.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
