CONDITIONS OF APPROVAL

This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of the permit does not assure the applicant that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.

(5) THE LOCATION OF THE PROPOSED WELL and the area on which the water will be used must be indicated on the diagram below. Use the CENTER SECTION (1 section, 640 acres) for the well location.

The scale of the diagram is 2 inches = 1 mile
Each small square represents 40 acres.

WATER EQUIVALENTS TABLE (Rounded Figures)

An acre-foot covers 1 acre of land 1 foot deep
1 cubic foot per second (cfs) . . . 449 gallons per minute (gpm)
A family of 5 will require approximately 1 acre-foot of water per year.
1 acre-foot . . . 43,560 cubic feet . . . 325,900 gallons.
1,000 gpm pumped continuously for one day produces 4.42 acre-feet.

(6) THE WELL MUST BE LOCATED BELOW by distances from section lines.

450 ft. from S sec. line
(north or south)

2000 ft. from W sec. line
(east or west)

LOT -- BLOCK -- FILING # --

SUBDIVISION --

(7) TRACT ON WHICH WELL WILL BE LOCATED

No. of acres 40 . Will this be
the only well on this tract? yes

(8) PROPOSED CASING PROGRAM

Plain Casing

8-5/8 in. from surface ft. to 254 ft.

in. from ft. to ft.

Perforated casing

ATTACHMENT TO FORM WRJ-5-73
FOR EASTMAN KODAK FIRE-FIGHTING WELL NO. 1

Item (11):

Eastman Kodak Fire-Fighting Well No. 1 is an oil and gas well drilled in accordance with the rules and regulations of the Colorado Oil and Gas Conservation Commission. It is now being abandoned. The well was drilled by Exeter Drilling and Exploration Company, 2300 Lincoln Center Building, Denver, and was designated "Eastman Kodak No. 1." The casing below the surface casing will be pulled by J. W. Gibson Well Service, Inc., Petroleum Club Building, Denver, in late December, 1974, or in early 1975. The well will be plugged below the surface casing in accordance with all of the rules of the Commission.

Oil Well Perforators, Inc., Petroleum Club Building, Denver, or some similar company, will perforate the surface casing already cemented in place. The precise depth will be selected after gamma ray surveys, but it will probably be at approximately 90-120 feet and 250 feet. The Driller will then install a temporary pump and test the well.

After it has been appropriately tested, the well will be capped and locked by Applicant. It will be used exclusively for fire-fighting purposes with a portable pump. Should the Applicant instead decide to install a permanent pump, it agrees to submit an application to the State Engineer.
