Operator Comment: As discussed with John Heil with the COGCC, on April 25th at 1:06 PM, this is an on going reclamation site, we had to stop shredding soil last fall due to snow and weather. We need to sample the site and run analytical results to see if the soil is under the Table 915-1 requirement. We are planning to do this when we have other areas to sample, if it is under the requirements, we will submit the appropriate Form 27S, if the soil analytical is not below the requirements, we will continue shredding the soil.
