Hi Brandon,

The following are initial details in regard to a recent produced water/crude oil release observed at the Critter Creek 18SW production facility. You are being notified of this release because it occurred within CPW designated Mule Deer Severe Winter Range and Mule Deer Winter Concentration HPH. Cleanup operations will be limited from 2 hours after sunrise and 2 hours prior to sunset.

Incident Date: 12/24/2022
Operator: HPR
Location: Critter Creek 18SW

Location ID: 443771

County: Weld

Coordinates: 40.916159° / -104.481729°

Legal: Lot 4 18 11N 63W

Description: A weld on a produced water loadline failed resulting in approximately 250 bbls of a produced water and crude oil combination being released inside of a lined secondary containment. Vac trucks were dispatched to begin removing the pooled fluid. The integrity of the liner will be verified prior to replacing ballast material. If impacts are discovered beneath the liner, the soil will be removed and confirmation soil samples will be collected in compliance with COGCC Table 915-1. A Form 19i has been submitted under Doc # 403271215.

Please let me know if you have any questions.

Thanks,

Luke
