Comment An inspection was only performed at the tank battery. The tank battery was shared with PDC. Noble's portion of the tank battery has been fenced off. The tank battery consists of weedy, annual vegetation that is not reflective of reference areas.

Note- the associated TA'ed wells have to be plugged by 12/31/2030. Noble will be responsible for reclaiming all the associated access roads.

Corrective Action Perform reclamation in accordance to Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards.

The corrective action date is the date the location was observed out of compliance.
