March 15 1951

Following is a (notice on intention to do work) (On land)
(~~report of work done~~) (patented) described as follows:

Colorado	Logan	Merino
State	County	Field
J-6	McLane	SW SW NW, Sec. 34
(Well No.)	(Lease)	(Sec. and $\frac{1}{4}$ Sec.)
		7 N.
		(Twp.)
		54 W.
		(Range)
		6th PM
		(Meridian)

The well is located 2310 ft. (N) of N. and 330 ft. (E) of W.
(S) (W)

Section 34

To be reported later

The elevation above sea level is _____ ft.

Details of Plan of Work: (State names of and expected depths to objective sands:
Show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement-
ing points, and all other important proposed work.)

We propose to drill a well, employing rotary tools, in the Merino Prospect Field
on the McLane Lease, the well to be known as McLane J-6. The proposed well will be
drilled to the Dakota Formation.

It is expected that approximately 150 feet of 10 3/4", 8 RT, 32.75# casing will
be set as surface casing and will be cemented to the surface.

It is estimated that the Dakota formation will be found at approximately 5075
feet below the kelly bushing. In the event that a production string is needed, 5 1/2"
OD, 14#, 8 RT casing will be set at the top of the production formation and cemented
with enough cement to conform with good engineering practice.

All measurements will be from the kelly bushing.

Approved: _____
