VEGETATIVE COVER _____

Comment:

	<p>This location does not comply with Rule 1004. During this inspection, Staff observed that it did not appear the access road to the location has been reclaimed with the presence of roadbase/asphalt, and no evidence of contouring or grading to reflect adjacent reference areas. The former well location did not appear to be progressing towards 1004 reclamation standards with evidence of non-uniform vegetation cover resulting in large areas of bare soil. Additionally, undesirable vegetation (e.g. russian thistle) was observed throughout the reclaimed portions; this weed species was not observed in the reference areas. Refer to attached inspection photos for documentation.</p>	
Corrective Action:	<p>Comply with Rule 1004. Reclaim access roads and reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management. Corrective action date is the date the location was observed out of compliance.</p>	Date 05/15/2023
Overall Final Reclamation	Fail	Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
