Good morning Lilah,

Thanks for your patience with my reply.

Yes, I approve of those BMPs, and appreciate that this work will occur outside the sensitive seasons.

Regards,

**Brandon B. Marette, CWB®**

Hi Brandon,

Civitas is planning gas lift equipment work (removal/install) at the [North Platte 14-34](#) and [Latham 34-2](#) Pads, both of which are located in **Mule Deer Severe Winter Range HPH**. The Latham location is also within a **Bald Eagle Roost Area HPH**.

Civitas is hoping to conduct this work in May, **OUTSIDE both applicable HPH seasons**, as soon as necessary forms are approved. Here are more details and proposed BMPs in case this work is delayed into either season:

Location Name	TRS	Loc ID	Lat/Long	HPH	Proposed BMP
North Platte 14-34	5N63W Sec 34	428272	40.350227, -104.430330	<b>Mule Deer SWR</b>	<u>Operations are currently scheduled to begin outside the mule deer winter season.</u> If operations must occur during the mule deer winter season, operations will be restricted to 2 hours post-sunrise to 2 hours pre-sunset between Dec 1 - Apr 30.
Latham 34-2	4N63W Sec 2	432800	40.33513, -104.403460	<b>Mule Deer SWR Bald Eagle Roost</b>	<u>Operations are currently scheduled to begin outside the mule deer winter season and bald eagle roost season.</u> If operations must occur during the mule deer winter season, operations will be restricted to 2 hours post-sunrise to 2 hours pre-sunset between Dec 1 - Apr 30. If operations must occur during the roost season, at least two non-consecutive roost surveys (one AM and one PM), separated by one week, will be conducted: if roosting is observed, operations will be limited to 2 hours post-sunrise to 2 hours pre-sunset.

Please let me know if CPW approves this plan or if you have any questions. Civitas will submit the necessary forms for this work as soon as this consultation is approved.

Thank you!
