General Comment:

on 3/14/2023 COGCC staff, Kris Neidel inspected the Maudlin Gulch #24. Weather; 65 degrees, , the creek and ditches were full with spring runoff. Surface water was flowing on and accross the access roads. The well has been reported as PA, no wellhead marker was present the only observable sign of production were; the pad, one flowline riser, flowline marker. Corrective Actions: Samples for REM #29154 should include those on the approved Form 27 and below removed equipment at the flowline riser. NO cement pads shall be incorporated in reclaim or left on pad after abandonment. See attached Photos.

Environmental**Spill/Remediation:**

Comment: When Project 29154 was approved, it was not stated that a flowline riser was present south of the wellhead and cement from production phase was near flowline.

Corrective Action: Samples for REM #29154 should include those on the approved Form 27 and below removed equipment at the flowline riser. NO cement pads shall be incorporated in reclaim or left on pad after abandonment.
