General Comment:

On 5/17/2023, Reclamation Specialist O'Malley conducted a final reclamation and stormwater inspection at GRMR OIL & GAS LLC's BEAVER-DURHAM-65N90W/32NWSW Location #312930 in Moffat County, Colorado.

The following compliance issues were observed during this inspection:

- Noxious weeds
- Perennial vegetation not uniform, does not meet vegetation standards

Refer to the "Location," "Reclamation" and "Stormwater" section of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Comment:

Corrective Action:	<p style="color: blue;">It was observed in this inspection that final reclamation has been performed and overall the site appears to be progressing towards 1004 vegetation standards. However, the location "Failed" due to lack of uniform perennial establishment. There are patches of bare ground throughout the location where seeded species are absent. It appears additional reclamation is required to establish perennial species in these poorly vegetated portions of the location. Poorly vegetated areas are concentrated at the center, in the former working pad/equipment areas.</p> <p style="color: red;">Conduct additional reclamation in accordance with COGCC 1000 series rules. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local soil conservation district. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until final reclamation has passed. Revegetation activities shall be completed no later than 11/15/2023.</p>	Date 11/15/2023
