General Comment:

On 5/23/2023, Reclamation Specialist Trujillo conducted a final reclamation inspection at Caerus Piceance LLC's Milholland 25-1 location in Mesa County, Colorado.

The following compliance issues were observed during this inspection:

- Final Reclamation
- Stormwater

Refer to the "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Location received a 502.b SOVR on 9/9/2020 (#401598627) to waive select requirements of rule 1004.a & 1004.d regarding Location and access road. Pursuant to Conditions of Approval #1 attached to the variance, Operator is required to stabilize, and establish 80% vegetation cover of reference areas at the cut slope.

It was observed in this inspection that vegetation on the cut slope is not progressing towards a uniform vegetative cover; slopes lack stabilization and are predominantly bare and exposed soils. Erosion degradation observed. Additional reclamation required at cut slopes of the Location.

Corrective Action: **Comply with Form 4 #401598627 Conditions and conduct additional reclamation at the cut slopes.**

Date **07/24/2023**

Overall Final Reclamation **Fail**

Comment: Location received a 502.b SOVR on 9/9/2020 (#401598627) to waive select requirements of rule 1004.a & 1004.d regarding Location and access road. Pursuant to Conditions of Approval #4 attached to the variance, Operator is required to continue to monitor and manage the site for erosion until final reclamation is passed.

It was observed in this inspection that the Location is out of compliance with COGCC Stormwater, and Form 4 requirements; slopes lack stabilization and are predominantly bare and exposed soils; Erosion degradation observed.

Corrective Action: **Comply with Rule 1002.f and Form 4 Condition requirements: Install or repair required stormwater and erosion control BMP to stabilize the cut slopes, and to manage runoff in such a manner that minimizes erosion, degradation and sediment transport. Ensure BMPs are installed in accordance with good engineering requirements, and maintained in proper functioning condition.**

Temporary stormwater controls are required until additional reclamation efforts at the cut slopes have been completed, at which point additional BMPs are required to manage runoff, and to stabilize the slopes, and the seeded soils, until long-term stabilization has been achieved. Continue to monitor and manage Location for stormwater until final reclamation has passed.

Date: **05/27/2023**

Pits: ☐ NO SURFACE INDICATION OF PIT
