Subject: FW: Form 44 - in place closure request - Maudlin Gulch #24, Maudlin Gulch #17 and Stroock NCT 1-3
Date: Tuesday, May 23, 2023 4:09:32 PM

Ellice;

Per our phone conversation this morning, below please see the email from Colowyo to Tom Kirkwood regarding the in place abandonment request.

Is this sufficient for the COGCC to approve our Form 44- in place abandonment request, or do I need to provide additional information?

Thanks,

Dave

Good morning Tom,

The Company does want them left in place. This is less cost to you all and less disturbance for the resource.

I think what I need is to add the underground infrastructure to our maps so that when needed we have that information. Can you all send that to me? I can ask our GIS to store it for us.

I am glad I am not using the drought topic but the amount of moisture is amazing now, we have not yet hit high water in the Yampa.

Thanks,
Tonia Folks

Tonia,

The COGCC has been asking for additional data on the Flowline abandonment stated below. They are requesting either some additional vegetation data or approval from the land owner. I wanted to follow up real quick and ensure that you wanted the lines abandoned in place? If not we can pull them out as well, we are just wanting to get these closed out.

Thanks a bunch and hope all is going well for you guys. The snow melt has been crazy out there!!

Thanks

Tom
