Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Per rule 911, facility decommissioning results in soil investigation after equipment is removed.

PROPOSED SAMPLING PLAN

The wellhead, drying tower, tank and meter will be sampled. Each will be a grab sample analyzed for components pursuant to 915 rules. There will also be three background samples analyzed for arsenic, pH, electrical conductivity and sodium adsorption ratio.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):

OTHER INVESTIGATION INFORMATION

☐ Were impacts to adjacent property or offsite impacts identified?

☒ Were background samples collected as part of this site investigation?

3 background samples were collected as apart of this investigation. The three background samples had exceedances in arsenic, and one of the samples had an exceedance in pH.

☐ Was investigation derived waste (IDW) generated as part of this investigation?

Volume of solid waste (cubic yards) _____

Volume of liquid waste (barrels) _____

☒ Is further site investigation required?

Utah Gas Corp has collected additional samples around the wellhead, meter, "dry stack" and tank. The well head was sampled in such a way to delineate the extent TPH impact. UGC also collected additional background samples to be used as comparison. These samples were collected on 4/28/2023 and were sent to the lab immediately after collection. UGC plans to communicate the sample results on the next supplemental form 27.

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

TBD - at this moment, no source removal is projected.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

If no impacts are identified; project will be closed within 1 month of soil sampling date. If impacts are discovered; timeline will be delayed and project will have updated timeframe to reach NFA adjusted to remediation scope.
