Comments:

The Subject Well Site is plugged and abandoned, and ENR has completed a majority of the reclamation requirements to restore the land to its pre-development condition consistent with landowner consent, including removing all associated production facilities and equipment and revegetating disturbed areas. ENR and the surface owner entered into Surface Owner Waivers for the access points, roads, and small improvements the surface owner wants to retain. Upon 2022 inspections, it has been determined that the following work is still necessary on the Subject Well Site in order to complete all of the reclamation requirements:
Reseeding all cut slopes around pit, approximately 0.4 acres, to reach 80% vegetation requirements; and fixing rill erosion occurring on the west cut slope of the pit.

The Application for Rule 502 variance from the final reclamation requirements of Rule 1004.a for access points and roads, including roads that predate oil and gas development, and other small discrete improvements that the surface owner wants to retain at the Julieanna Well Site in Las Animas County, Colorado is GRANTED. Landowner also requested an offsite pit remain for future use as a stock pond and for stormwater runoff.
