Inspection Photos  
Location Name: Razor 27J Pad  
Location ID: 434267

**Photo 4.** Eastern interim area/topsoil stockpile. During this inspection Staff observed that the interim areas are not progressing towards reclamation standards with evidence of non-uniform vegetation cover resulting in areas of bare soil and undesirable vegetation (e.g. kochia) was observed growing throughout. A Colorado List C Noxious Weed (e.g. cheatgrass) was also observed to be growing within the interim areas and will need to be managed for during the growing season. Additional reclamation activities are required in order to meet Rule 1003 standards.

Inspection Photos  
Location Name: Razor 27J Pad  
Location ID: 434267

**Photo 5.** North side of production areas. During this inspection, Staff observed that northern portions of the production area are experiencing rill erosion. Repair/maintenance of stormwater BMPs should be implemented to stabilize the areas experiencing erosion.
