Overall Good: ☐**Spills:**

Type	Area	Volume		
Comment:	Previous inspection observed a leak that had occurred at the compressor which sprayed offsite to the northeast. A form 19 spill report was submitted since previous inspection. There are still stained soils on location at the east side of the compressor and to the northeast that drifted off the location. There was blackened soils and vegetation with a hydrocarbon odor. Stained soils have not been cleaned up and there was no containment BMP's at the impacted area. There have been stormwater events since previous inspection which have likely transported contaminated material further out. Previous corrective action has not been completed.			
Corrective Action:	Immediately Control and contain spills/releases and clean up per Rule 912.a.			Date: 04/12/2023
