General Comment:

This is an environmental inspection for Location ID 332643 Platte 23-2 wellhead. Any corrective actions from previous inspections that have not been addressed are still applicable. There were operator and contract environmental personnel as well as COGCC staff on location at the time of this field inspection. Photos attached to document site conditions.

Location**Lease Road:**

Type			
comment:	Lease road was in good condition, however, temporary access road had to be created to circumvent the landowner's cornfield which had been recently planted.		
Corrective ActionL		Date:	

Overall Good: ☐**Emergency Contact Number:**

Comment:	In good condition.	Date: _____
Corrective Action:		

Overall Good: ☒**Spills:**

Type	Area	Volume		
------	------	--------	--	--

In Containment: No

Comment: API 123-25712 took a frac hit due to a ball valve failure. It was actively leaking on location within the landowner's field. Well was eventually shut in by KMG personnel. Spill radius is currently undetermined but preliminary onsite PID readings show limited spread of contaminants.

☐ Multiple Spills and Releases?**Venting:**

Yes/No
