**3** CA# 168043

Corrective Action: Remove and properly dispose of oily waste. Comply with Rule 912 cleanup requirements and submit documentation of cleanup on a FIRR form per Rule 912.a.(5).

Date: 03/22/2023

Response: CA COMPLETED

Date of Completion: 06/13/2023

Operator Comment: Small area of oily waste observed outside of containment during inspection was initially sampled on 4/6/23. Results showed TPH impacts above Table 915-1 standards so the area was hydro excavated to a depth of 1 foot below ground surface and resampled. Analytical results indicated that Table 915-1 compliance was achieved and the issue was appropriately resolved.
