Ladies and Gentlemen:

My name is Roy Dyer, and I operate Prairie Resources, LLC, Dyer Well # 15-8 on the SW quarter of the SE quarter, Section 8, Township 7N, Range 64W, Weld County, Colorado. Our operator number is 10361 and the API for this well is 123-32935. We only operate this one stripper (low producing) well, and have since getting our permit to drill in 2010.

Our situation is somewhat unique in the fact that we own 100% of the surface rights, 100% of the mineral rights, and 100% of this well. I have lived on this property for over 73 years, and the property has been in our family since 1939.

We are very environmentally conscientious and have always employed best practices to minimize any environmental impact on our property or surrounding air quality. When we set up our well site, we did not doze or move even one yard of virgin soil to construct the well site.

We hauled in the minimum amount of road base material to set the drill rig base on, and required all contractors to absolutely minimize any disturbance of the site during their various operations. Consequently, we feel reclamation costs will be minimal when we choose to plug this well.

We own numerous pieces of construction equipment including a large rubber tire loader, dozer, semi-trucks and semi-trailers including end dumps, and belly dumps, a crane, tractors and other heavy earthmoving equipment. We are fully capable of reclaiming this location by ourselves after the well has been professionally plugged in the future.

We have carried a \$60,000 plugging bond on this well since 2010, which is on file with the COGCC and current through 12/16/2023. We want to assure the COGCC that we have the financial capability to plug and reclaim this well. Please allow this letter to serve as our assurance that we have the financial capability and the wherewithal to plug and reclaim this well.

Best regards,

Roy Dyer
