 TRANSECT RESULTS OF DISTURBED AREA% _____
 TRANSECT RESULTS OF REFERENCE AREA% _____
 TOTAL % OF DESIRABLE VEGETATION COVER _____
 VEGETATIVE COVER _____

Comment:

COGCC Staff, Chris Binschus, met with an Operator representative to conduct a site investigation. Operator has performed a preliminary soil analysis at the location, is in the process of developing a Reclamation Plan and will conduct further reclamation when environmental conditions allow so.

At the time of this inspection, the location consists mostly of annual weeds with little to no perennial vegetation that is not reflective of reference areas; perimeter fencing is present and will likely remain in place during final reclamation. Weedy annual vegetation has spread off location along portions of the perimeter location. Refer to the attached inspection photos.
