<p>Comment: Operator has submitted and implemented the stormwater management plan which was required per NOAV #403104417. The containment around the open top tank has been reinstalled per the plan specs. There has been a revegetation area near the well and adjacent to the river. This area is not stabilized as straw mulch has blown off the area leaving bare soils. Additional BMP's need to be installed to prevent erosion of this area and along the road where scouring occurred. Stormwater management must be designed, implemented, and maintained according to good engineering practices which may require further actions beyond the scope of the plan.</p>						
<p>Corrective Action: Install or repair required BMPs per Rule 1002.f.(2)</p>						<p>Date: _____</p>
<p>Pits: <input type="checkbox"/> NO SURFACE INDICATION OF PIT</p>
