Supervision of Personnel & Equipment:

6/5/23: Roaded to location. Spotted in rig. SDFN.

6/6/23: Warmed up rig. Rigged up. Unhung well. Unseated pump. Pulled rods. Laid on flat bed trailer. Took rods to gas plant. Rigged up for tbq. Unladed tbq. Had trouble releasing anchor. Called Oil and Gas Kim for permission to leave anchor in case anchor would not come loose. Worked anchor. Came loose. Pulled half the string. Laid on trailer. Capped off well. SDFN.

6/7/23: Warmed up rig. Finished pulling tbq. Stood 24 stands in the derrick. Rigged up Brand-X. Set CIBP at 5,552' with 4 sacks cement. Set another CIBP at 4,706' with 4 sacks cement. Perforated squeeze holes at 1,500'. Set CICR at 1,450'. Perforated squeeze holes at 417'. Rigged down Brand-X and released. Ran tbq. with CICR stinger to CICR. Mixed and pumped 45 sacks cement. Pumped approximately 30 sacks into squeeze holes. Stung out of CICR and left approximately 15 sacks on top of CICR. Pulled tbq. Laid on trailer. Mixed and pumped approximately 128 sacks cement down casing back to surface. Clean up equipment. SDFN.

6/8/23: Checked cement plug. Plug was down hole quite a way. Had Hottinger Excavating deliver 40 sacks cement. Filled casing and surfaced to top. Rigged down and released.

Thank you.
