\* DESCRIBE LEASE The SE $\frac{1}{4}$  Sec. 9, and that part of NE $\frac{1}{4}$  lying south and east of Chicago Burlington, & Quincy Railroad right-of-way, and south and east of a parcel of land described in a right-of-way deed recorded in Bk. 285, Pg. 172, from Gussie Montgomery -to- Logan Co., Colo; and SW $\frac{1}{4}$ NW $\frac{1}{4}$  Sec. 10-7N-53W.

Plains owns all of Section 9 and W $\frac{1}{2}$ W $\frac{1}{2}$  Sec. 10 by leasehold interest. Thus, to the proposed location we own all of the offsets. The reason we are requesting a 10-acre location is there is a surface sprinkler system on this quarter section. The arc of the sprinkler system leaves only the four corners of the quarter section for drilling and producing equipment that would not interfere with the surface sprinkler system. Further, in the lease obtained from the surface owner, there is a restriction that we can never interfere with the sprinkler system. In the event of production Plains would allocate 40 acres to this well and drill the offset wells on a 40-acre pattern. As for the remaining locations on SE $\frac{1}{4}$  Sec. 9, Plains would allocate 40 acres per drillsite although the drillsite would be a 10-acre location to avoid this sprinkler system.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.
