This permit form is covered by our performance bond filed in connection with our State #1 well. This Notice should have been forwarded to you on the date it was executed, but it was overlooked in our file. For your information this well was drilled to a total depth of 4746 feet by driller's measurements and 4745 feet by Schlumberger measurements, and a drill stem test, with negative results, was made from 4688-93 feet in which we recovered only drilling mudslightly oil cut. Therefore, the well has been abandoned on even date hereof. If a separate abandonment form is necessary, please send us proper form and we will file it immediately.

Heavy mud has been left in the hole and cement plug has been set at the bottom of the surface casing.
