COLO. OIL & GAS CONS. COM.

Dear Mr. Bicknell:

Enclosed is UPRC's Application for Permit to Drill the above referenced well together with mineral/lease ownership information for the N/2 of Section 24, Township 16 South, Range 52 West. UPRC has selected an exception location 288' from the south lease line in order to drill the most favorable location selected on a particular shot point of seismic data running through this area. The primary objective in this well is the Morrow channel sands which are typically narrow and sinuous in nature. UPRC believes that it is imperative to drill on the exact shot point to provide the best possible evaluation of this wildcat prospect.

Inasmuch as both of the mineral owners in the S/2 of the NW/4 (encroached section) are also minerals owners in the N/2 of the NW/4 (well location) and whereas, all mineral owners in the entire N/2 of Section 24 are under lease to UPRC, we hereby request that this exception to COGCC Rule 318 be granted administratively.

Should you have any questions or require additional information, please contact me at 817/877-7325.

Respectfully yours,

UNION PACIFIC RESOURCES COMPANY
