Complaint

Comment: This inspection is in regard to complaint #403465774 and #403470489. Both complaints are the same issue at the same wellsite location regarding trespassing and spraying willows at the beginning of the access road. See complaint documents for full details.

On 7/20/2023, ECMC Reclamation Specialist observed dead willows along the road side at the beginning of the access road. It appeared the willows had been treated with herbicide which wilted and caused willows to turn brown only adjacent to the road side. Further along the access road undesirable weeds were wilted from recent weed control. The willows are not considered a weedy specie and should not have been controlled with herbicide use. The dead willows are now considered debris and will need to be cut and removed from the ROW.

The complainant identified where contractor drove on private road and sprayed vegetation which was observed wilted. Operator must ensure contractor does not travel outside of original access road boundary per Rule 1002.e.

Corrective Action: **Comply with Rule 606 and remove dead willow debris.**
Corrective action will remain out of compliance until completed.

Date: 07/20/2023
