**General Comment:**

**CECMC Inspection Report Summary**

On Friday 7/28/2023, I, Inspector Scott Ramsey, conducted a routine inspection at TEP PA13-34, at Location # 335436 in Garfield county Colorado.

Any Corrective Actions from previous Inspections that have not been addressed are still applicable.

While there, I observed normal production operations. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife Management. Operator (TERRA) has provided there Piceance Basin Storm water Manual of BMP's (SC-4) for a tracking pad. No evidence of a tracking pad on location.

During this inspection the following compliance issues were observed:

1. Meter calibration card not conspicuously posted.
  2. Cut slope shows signs of erosion, lack of stabilization and is encroaching on production equipment.
  3. Weeds have become debris along fencing.
- Refer to photograph of observed compliance issue.

A follow up on this site inspection may be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
