Number of barrels spilled	1
Emergency precautions taken	N/A
Extremely hazardous substance	No
Acute or chronic health risks	No
Did the spill affect or end near a waterway, irrigation ditch, or a retention pond?	No
What caused the spill/release?	Equipment failure

Narrative

Include specific incident information and mitigation actions taken to stop and clean-up the spill/release

A compromised line resulted in approximately 1.5 bbls of oil to be released to the ground surface and an unknown volume to the subsurface. Operations were immediately halted, and a vac truck was dispatched to remove the standing surficial fluids, which were limited to the pad surface. The line is scheduled to be exposed and repaired and will be pressure tested prior to returning to service. The impacted soil will be removed and hauled for disposal. Confirmation soil samples will be collected in compliance with ECMC Table 915-1. Due to the release being strictly crude oil, Crestone requests to amend the sampling and analysis plan to only include TPH (C6-C36) and Organics.

Acknowledgement

I acknowledge that a written follow-up notice must be submitted to Weld County OEM/LEPC as soon as practicable after the release. The follow-up notice must update information included in the initial notice and provide information on actual response actions taken and advice regarding medical attention necessary for citizens exposed.
