17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Date of work June 1977

Sundry Notice dated Oct. 4, 1976 advised the setting of cement plugs and installation of regulation marker. At that time the well was classified as "Temporarily Abandoned" pending further geological study of the area which would result in (a) setting a whip-stock & directionally drill, or (b) pulling 9-5/8" OD casing and permanently plug and abandon. The geological study indicated that additional information would not be obtained by directional drilling and the well should be abandoned. Under present circumstances, recovery of the 9-5/8" casing is not deemed economical and will remain in the hole. The location and road have been reshaped and reseeded was completed June 3, 1977. Location and road are ready for inspection.
