General Comment:

On 8/14/2023, Reclamation Specialist Trujillo Inspected Genesis Gas & Oil Colorado LLC's FGSU 9-14 location in Rio Blanco County, Colorado.

This inspection is a followup-up to #696203808 and #696204901 to document compliance with the following Corrective Actions:

- Final Reclamation
- Stormwater Management

This inspection is also in response to NOAV #403440906 requiring compliance with 1004 Rules; unable to find record that an "Answer" has been filed by Operator in response to the NAOV, pursuant to Rule 523.c.(2).

It was observed in this inspection tha the Location remains out of compliance with ECMC Rules, Corrective Actions and NOAV requirements.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable; The "Date of Discovery" is being provided as the corrective action date for all new observed compliance issues. Location will remain out of compliance until corrective action(s) has(have) been resolved and a follow up inspection will be conducted to ensure the compliance issues have been corrected to comply with ECMC rules.

Comment: [See "COGCC Comments".](#)

Corrective Action: Comply with Rule 1002.f. Install or repair required stormwater and erosion control BMPs at the Location and access road; temporary controls required until final reclamation work is performed, at which time additional BMPs will be required until long-term stabilization (such as revegetation) of the disturbances have been achieved. BMPs are required to be installed in accordance with Good Engineering Practices, and maintained in proper functioning condition at all times.

Date: 05/04/2023

Stormwater management required until final reclamation is achieved pursuant to 1004 Rules.

Pits: ☐ NO SURFACE INDICATION OF PIT**COGCC Comments**

Comment	User	Date
<p>STORWMATER COMMENT</p> <p>Previous inspection observed that stormwater management on the Location and access road is inadequate:</p> <p>-Unstabilized/unmaintained slopes have resulted with rock-falls onto the access road; Location was inaccessible by vehicle. Imminent safety issues also exist due to the unstable boulders and rocks observed on the disturbed slopes.</p> <p>-BMPs to minimize erosion, degradation and off-site sediment transport are missing or insufficient on the Location and access road. Runoff is resulting in gully erosion within ruts of the road; runoff and stabilization controls at road inadequate. Cut slopes lack stabilization.</p> <p>It was observed in this inspection that corrective actions to comply with Rule 1002.f have not been taken by the Operator; Location remains inaccessible by vehicle due to rock-falls on the road; Cut slopes of the Location and access road remain unstabilized. Erosion degradation on Location and access road has persisted.</p>	trujilloam	08/15/2023

RECLAMATION COMMENT

trujilloam

08/15/2023

All Form 2 and Federal "permits to drill" on file for the Location have expired; Form 2 #400473210 expired 4/10/2016, Federal APD (doc. no 1828411) expired 7/31/2010.

Previous inspections observed that the Location has been constructed, and various surface equipment (pipe, risers, cellars) have been installed at the Location and along the access road; no wells have been drilled; work to maintain the Location and access road has not occurred. Location subject to Final Reclamation Requirements; inspections required Operator to comply with Rule 1004.a by 9/15/2022.

It was observed in this inspection that final reclamation of the Location and access road has not been conducted; Location/Access road has not been decompacted, recontoured/regraded and reclaimed. Surface equipment along the road/Location has not been removed. Culverts along the access road remain, drainages have not been restored; Access road has continued to degrade. Undesirable Plant Species (Tamarisk, Halogeton) also observed established on the Location and access road; ongoing weed management required on Location and access road until Location receives a passing final reclamation inspection.

Original corrective action and date remains applicable: Submission of additional permits does not waive compliance with 1004 requirements- See "Notice to Operators: Interim Reclamation Procedures for Delayed Operations" dated January 5, 2017.
