VEGETATIVE COVER PASS

Comment:

The well location (Location ID 410544 with API 125-06225) appears to meet final reclamation vegetation standards. The well location appears to meet Rule 1004 vegetation standards with the disturbance area (82%) of the adjacent reference area based on field performed vegetation transects. Livestock exclusion fencing remains on location and will need to be removed in order to meet Rule 1004 standards and regulations for final reclamation. Therefore, this location is "IN PROCESS" until all equipment (e.g. fencing) has been removed. Refer to attached inspection photos and transect data.
