Ellice,

Thank you for taking the time to talk with me today! As discussed, we have verbal approval to remove a portion of the Miller 24-17 (12320725_FL) flowline so that the field can continue the contamination dig at the Mille 14-17. I will submit a pre-abandonment notice and we will also follow up with a post-abandonment form.

Thank you again!

Good afternoon, Ellice-

I am following up on a voicemail I left about the Miller 24-17 (12320725_FL) flowline. A portion of the flowline will need to be removed to further excavate contamination at the Miller 14-17 (05-123-07960). This flowline only services the Miller 24-17. This well is shut-in and on the OOSPL. We are hoping to get approval for the removal in an effort to keep the contamination dig moving forward. Please let me know your thoughts or let me know of a time you are available to talk.

Thank you!
