1004.d. FINAL VEGETATION TRANSECT

TRANSECT RESULTS OF DISTURBED AREA% 24

TRANSECT RESULTS OF REFERENCE AREA% 60

TOTAL % OF DESIRABLE VEGETATION COVER 40

VEGETATIVE COVER FAIL

Comment: **This location does not comply with Rule 1004. During this inspection, Staff observed that there appears to be subsidence around the former well head, and the former production areas are predominantly bare/exposed soils. Vegetation transects performed over the former production facilities indicates that desirable perennial vegetative cover is approximately 40% to that of the reference areas. Refer to attached transect data and inspection photos for additional information.**

Corrective Action:	Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management. Corrective action date is the date the location was observed out of compliance.	Date	08/10/2023
