Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR COMMENT

Summit Midstream (Summit) proposes the following drilling and sampling plan to delineate this spill: one boring outside the original excavation area (southwest) to laterally delineate inorganic impacts. For these borings, Summit requests the reduced analyte suite of SAR and EC only. Summit plans to use produced water/operator knowledge for any unaddressed Arsenic and/or pH exceedances. Please see attached Figure for planned drilling and sampling locations. Please see previously submitted data (Doc # 403293025) for exceedances at this Site.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.

Environmental	Based on the information provided under Operator Comment and analytical data (doc #403293025), the Operator's request for a reduced analyte suite of EC and SAR only is conditionally approved. Note: additional sampling may be required to address arsenic and pH exceedances, depending on the results of the site-specific waste characterization sampling described under Operator Comment.	09/06/2023
