**COMMENTS:**

A Form 4 bradenhead mitigation plan to install a surface kit on this well was approved on 4/17/2023. The kit was installed on 5/17/23 following a period in which bradenhead pressure was mitigated through abatement truck utilization. Flowrates were recorded, and the well flowed a total of 145 SCF over a 90-minute period. Additionally, the liquid flowrate was 0.0 gallons over a 90-minute period. On 8/21/2023 a Form 17 was completed with a starting pressure of 178 psi and an ending pressure 0 psi. The surface kit was shut in for 2 months prior to the test. During the test a bradenhead gas sample was collected and results will submitted once received. The surface kit will remain on location for the next 12 months and continue to be used as a mitigation strategy to maintain bradenhead pressures below the 50-psi threshold. Chevron will perform another Form 17 test on or by 8/30/2024 and a follow up Form 4 will be submitted to the COGCC.

### **CONDITIONS OF APPROVAL, IF ANY:**

**COA Type**

**Description**

1 COA	1. Operator will implement measures to control venting, to protect health and safety, and to ensure that vapors and odors from well operations do not constitute a nuisance or hazard to public welfare. 2. Bradenhead gas is not to be vented to the atmosphere; any gas from the Bradenhead will be routed to an enclosed tank and/or combustor. Shut in bradenhead pressure shall not exceed 50 psig. Operator will implement measures to get an estimate of the gas flow rate and/or volume from the bradenhead. 3. By 8/21/23, conduct a bradenhead test, submit a Form 17, and submit a Form 4 Sundry that summarizes current well condition. The sundry should include details of the future plans, sample analysis interpretation, bradenhead test description, and the flow rate information and pressure data.
	4. Shut well in for at least seven days to monitor and collect data to characterize build up pressures then conduct a new bradenhead test and submit the Form 17 within ten days of the test. 5. If a sample has not been collected from surface casing within the last twelve months collect bradenhead gas samples for laboratory analysis. Sampling will comply with Operator Guidance - Bradenhead Testing and Reporting Instructions, Appendix A: Liquid and Gas Sampling. Copies of all final laboratory analytical results will be provided to the ECMC within three months of collecting the samples.
