Comment **This location does not comply with Rule 1002.c. Topsoil stockpile has significant weed cover- Tumbleweeds and cheatgrass- with no perennial vegetation that would compete with the weedy vegetation and generally work to decrease weed growth.**

Corrective Action **Comply with Rule 1002.c. Operator shall reseed the topsoil stockpile for long-term protection and stabilization of topsoil after performing interim reclamation activities.**

Date **09/13/2023**

**Note- there should be enough topsoil stockpiled after performing interim reclamation to facilitate future final reclamation activities.**

**The corrective date is the date the location was observed out of compliance.**

Comment This location does not comply with Rule 1003.b. Operator has failed to perform interim reclamation to reduce disturbance areas only reasonably needed for production operations. This location is over three (3) years out of compliance.

Corrective Action Perform reclamation in accordance to Rule 1003. All areas compacted by drilling and subsequent oil and gas operations which are no longer needed shall be cross-ripped to a depth of eighteen (18) inches. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards, including stormwater and weed management.

The corrective date is the date the location was observed out of compliance.
