17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

18. Date of work _____ * Must be accompanied by a cement verification report.

A field inspection trip was made 11-08-85 with the B.L.M. (Alan Schroeder) and Twin Arrow, Inc. (Don Miller, Trenton Day, and Tom Humes). There is a well location and surface at the above location (I checked with a transit later), which fits "the well completion report" sent in 6-21-57. Twin Arrow, Inc. proposes to finish plugging this well with "Ready Mix cement", (approximately 25 feet of 7"), install Dry Hole Marker, remove dead men, rehabilitate location and send in subsequent report of final, plug and abandoned work done.

This leaves us with another problem, Twin Arrow, Inc. has a producing oil well (Newton #16A) 1920' FNL, 1390 FWL, Sec. 12-T1N-R102W which was on the Geological Survey map made in 1962. I can find nothing in Twin Arrow's files that come any closer than 300' to this location. It appears that we will have to renumber this well.

19. I hereby certify that the foregoing is true and correct
