17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Patterson Well Service and Salvage Co., of Grand Junction, Colorado has been retained to properly plug and abandon said well. Work on the well will commence before November 22, 1969. The following procedure has been outlined by Mr. Patterson:

1. Kill the well with heavy mud.
2. Place a twenty (20) sack plug across the productive zone and the perforations back into the seven inch (7") casing. (Elevation is approximately 2200 feet RTD)
3. Locate the free point across the seven inch (7") casing and recover any recoverable casing.
4. Place a 100' plug half way in and half way out of the seven inch (7") stub.
5. Place a ten (10) sack plug across the bottom of the surface casing.
6. Place a five (5) sack plug in the top of the hole and erect a dry hole marker.
7. Clean up the well location
