Report Note:

COGCC received Cordillerian's Report on June 23, 2000. Successfully completed SOW. Only minor BTEX concentrations (below state action levels) observed in location formerly reported as above state groundwater standard for benzene. All other groundwater sample were non detect for BTEX. I will be sending a copy of the report to the land owner along with a cover letter stating that, based on the information from both the land owners investigation and the investigation by the COGCC, the commission considers the site closed.
