Hi Alicia,

As we spoke on the phone yesterday NueVida Resources LLC is requesting approval to side track the Ardourel 33081718 4HU well at 3236'MD just below our coal zone and above the clays. Our coal zones at 2600-3050' mainly and then the clays start at 3600'MD and continue to ~4400'. I attached the details and plan for the KOP along with a brief WBD of the current hole with the plug in place planned. I also attached the updated planned sidetrack plan that also shows the exist wellbore we drilled to 5640' with last survey at 5498' before having losses and issues. Please let me know if you need anything else from my side.

Thanks,

Boone

Hi Boone,

Thank you for the update. This email serves as verbal approval to proceed with the proposed sidetrack. Please attach all documents to the Form 2 and submit as soon as possible.

Best regards,
Alicia Duran
