Site Investigation and Remediation Workplan (Supplemental Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

OPERATOR COMMENT

This Form 27 is being filed as a request for closure of the Julieanna 42-22 Offsite Pit Fac. ID:256448. A previous Form 27 Doc#200439613 was approved 5/24/2016 with the following COA: "Approval of this Form 27 is conditional based on approval of pending Form 4 variance request." ENR received an approved variance on 3/22/2023 Docket No. 210400057 for final reclamation at the Julieanna 42-22 well. This variance request included final reclamation of the Julieanna 44-22 offsite pit. Based on the approved variance as well as approved soil sampling analysis, ENR is requesting closure on Form 27 Remediation Project# 9685.

I hereby certify all statements made in this form are to the best of my knowledge true, correct, and complete.
