Manual Shut off Valve	Permanent	20

PRODUCTION

PRELIMINARY PROCESS FLOW DIAGRAM
Wavetech Helium, Inc.
1 Wavetech Harker Family 31-22
Section 22 T12S R43W
Cheyenne County, CO

Note: The well will be a conventional vertical well with no hydraulic fracking, stimulation, or flowback. All formation water during well completion and all produced water during production will flow to an on-site separator for separation of oil and water. Oil and water will be stored in tanks. Oil will be trucked to a commercial transfer point. Water will be trucked for disposal at a commercial UIC well. The gas stream will be piped underground to the existing Ladder Creek Gathering System operated by Tumbleweed Midstream for processing off site.
