

Oil will be trucked offsite

Produced water will be trucked offsite

All gas piped to processing plant and separated there.

Legend	Status	Qty
Wellhead	Permanent	1
Heated Separator	Permanent	1
Water Tank 300 bbl	Permanent	1
Oil Tank 300 bbl	Permanent	1
Manual Shut off Valve	Permanent	20

PRODUCTION

Note: The well will be a conventional vertical well with no hydraulic fracturing, stimulation, or flowback. All formation water during well completion and all produced water during production will flow to an on-site separator for separation of oil and water. Oil and water will be stored in tanks. Oil will be trucked to a commercial transfer point. Water will be trucked for disposal at a commercial UIC well. The gas stream will be piped underground to the existing Ladder Creek Gathering System operated by Tumbleweed Midstream for processing off site.
